

Therapist Spotlight

Alec has been learning amazing speech strategies from Amanda for over a year and his progress is heart warming! She has the perfect mix of patience and assertiveness that lovingly get the job done and the results are Alec's significantly improved articulation. As a military brat, Alec has been paired with numerous speech therapists all over the country, and Amanda is, far and away, one of the most caring and effective therapists we have ever worked with.

For 3 years, we could not sign our 16 year old son up for therapies that we knew he needed due to some of his behaviors. Amanda took to him right away and through her professionalism, experience, kind and consistent nature provided him with exactly what he needed. His speech improved dramatically in the year he was with her. He is able to self advocate for the first time ever and his frustration with not being understood has decreased dramatically. As a parent who is constantly advocating for her son, it was refreshing to find a provider who took the initiative to explore techniques that would work for him during his therapy sessions

Amanda Miller
